Gpa: 3.38

2020 - Present

Govt. Degree Science & Commerce College - Block 7

Intermediate, Pre-Engineering
Grade: A

2017 - 2019

PROJECTS

Ecommerce Website

- A multipage responsive website in which one can view and place items in the cart ready to be shipped.
- The website was built using HTML, CSS and JavaScript.

Shipping Website

- A multipage responsive static website in which one can view and contact with the suppliers and get to know more about the company, the services they are providing, about the CEO and different news regarding the shipping markets.
- The website was built using HTML, CSS, Bootstrap and JavaScript

Facebook Clone

- A web application that replicates some of the key features of the popular social media platform Facebook. Users can register, log in, post text, images, and videos, add friends, send messages, like and comment on posts, search for people, and view a user page displaying their posts, friends, and pictures.
- The website is built using React.js and React Router for a seamless user interface, Blurhash for image placeholders, and Material-UI (MUI) for a polished design. Firebase is integrated to manage user authentication, real-time database, and storage, making this Facebook clone a fully functional and interactive social media platform.
